Due to changes in the Economic Security data measures, comparisons between 2000 and the current year should not be made.

1 A ranking of 1 means a county has the "best" rate compared to other counties in the state. Not all 83 counties can be ranked on all indicators.  
 2 For Child Health and Adolescence 2000 is actually 3-year annual average 1998-2000 and 2006 is 2004-06.  
 3 Family income for eligible students is below 185 percent poverty level.  
 \* Sometimes a rate could not be calculated because of low incidence of events or unavailable data.  
 NA not available.

Missing bars indicate no change or a rate could not be calculated; a "0" reflects no change.  
 Percentage change is calculated with unrounded rates.
