¹The year referenced as 2000 and 2009 represent rates derived from three-year averages 1998-00 and 2007-09 respectively

* A ranking of 1 means a county has the “best” rate among other Michigan counties. At least 81 counties were ranked on all indicators except for teens already mothers (69) and late/no prenatal care (72).

**2008-09 average – data are not consistent with 2000 after 2007.

Note: A decline represented by a negative percentage change is good news as all these measures indicate risk.
